Dear Michael Engstrom,

We will need the following changes to be made in order to accept your submission:

Engstrom, Michael Revisions

Michael,

I have audited your thesis – here are your revisions.

1) TITLE PAGE I have reformatted your thesis and have attached it here in both Word and pdf format. Please incorporate it into your revised thesis. It addresses the following problems—

- a. Twice you use the word "dissertation" rather than "thesis." While the usage of these terms is far from uniform across institutions, at PSU we use the term "thesis" for the Master's –level document and "dissertation" for the Doctoral document (PhD and EdD).
- b. The name of your degree is "Electrical and Computer Engineering" rather than "Electrical Engineering."
- c. You have double-spaced within all text blocks, but only the first two text blocks should be double-spaced; the bottom four blocks must be single-spaced.
- d. There must be no page number on the Title page.

2) Your page numbers are all in the bottom margin, only 3/4 inch from the bottom of the page—they must be at least a full inch from the bottom edge. You will need to change the distance from the edge of the footer.

In your Word document, if you double-click on the footer to open it up, you will see "Header and Footer Tools" open up in the ribbon. Just below that label is found "Footer from Bottom:" and a place to change the distance from the edge of the footer. Increase it to 1.0" and save. Then exit the footer by double-clicking in the body or closing it directly by clicking "Close Header and Footer" in the ribbon.

3) The Abstract must be double-spaced. (It is currently only one-and-a-half spaced).

4. The Abstract always falls on page i in a PSU thesis. You need to create a break in the numbering system between the Title Page and the prefatory pages just as you did between the prefatory pages and the body of the thesis (i.e. when you switched to Arabic numerals and restarted the numbering sequence with "1").

5) All of your headers should be in black, 12-point font—do not use blue font or 14 point font (as you did for the Table of Contents)

6) You have used 11-point font for your Table of Contents and your Lists. You must increase the font to 12-point.

7) The correct order for you Lists is List of Tables, then List of Figures, then List of Equations. Be sure to update the Table of Contents to reflect the new order.

8) VERY IMPORTANT, Starting with the body of the thesis (page 1), your left margin is only 7/8 inch wide. You must increase the left margin to 1.5 inches wide.

9) Text in the body of the thesis is also only one-and-a-half spaced. It too must be double-spaced.

10) Page 43 is blank. Please delete.

Note that the change in left margin, page number position and spacing will significantly shift text—please be sure to look for ripple-effects of the changes.

ALSO, we still have not received an ETD Access Form. This form is needed to designate the level of public access to

your ETD via the PSU library servers (PDX Scholar). This is similar to, but separate from, the access designation that you make for UMI/ProQuest. The form can be found at www.pdx.edu/ogs/forms. It is quick to fill out and only requires a student signature. As you selected Traditional Publishing with no release delay in UMI/ProQuest, the logical selection on the ETD Access form would be A. Open Access. Provided you first print out the form and sign it by hand, you may scan and email the form.

Please submit your revised thesis by Friday, August 30th. Please send me a return email to confirm that you have received this message.

Thanks!

To submit your changes, please go to the following page:
